LIST OF ILLUSTRATIONS

THE THREE-TOED SLOTH

Figures 1 to 23 inclusive

	PAGE
Plate A. Map; British Guiana Tropical Research Station of the New York Zoological Society.....	8
Plate B. Area devoted to research at Kartabo.....	10
Fig. 1. Head of adult male three-toed sloth.....	2
Fig. 2. Male three-toed sloth, showing great length of fore-legs and powerful tail which is used in climbing.....	4
Fig. 3. Sloth tree at Kartabo, isolated by a dry moat.....	6
Fig. 4. Sloth carried by seizing the hair in the middle of the back	9
Fig. 5. Three-toed sloth creeping painfully to the nearest tree....	12
Fig. 6. Three-toed sloth climbing a cecropia tree.....	12
Fig. 7. Mother and baby three-toed sloth, showing method of carrying the young when the parent is in motion.....	18
Fig. 8. Mother and baby three-toed sloth. The parent is beginning to wrap her body and limbs about the infant to protect it from danger.....	18
Fig. 9. Front view of head of a month-old three-toed sloth.....	25
Fig. 10. Sloth in the heart of a cecropia tree.....	25
Fig. 11. Profile of the head of an adult female sloth.....	30
Fig. 12. Mother and young three-toed sloth, the parent in full movement	38
Fig. 13. Mother and young two-toed sloth. Observe shorter fore-limbs and longer hair.....	38
Fig. 14. Three-toed sloth; embryo within a few days of birth.....	42
Fig. 15. The embryo as in Fig. 14, dried and relaxed to show perfection of development at this stage.....	44
Fig. 16. Adult female three-toed sloth. Observe lichen-like marks, well developed tail and rain-shedding slant of hair....	47
Fig. 17. Same as Fig. 16, lower view.....	50
Fig. 18. Three-toed sloth, four weeks old, back view.....	54
Fig. 19. Same as Fig. 18, lower view.....	55
Fig. 20. Reproduction of a plate of sloths from Captain Stedman's "Narrative of a Five Years' Expedition against the Revolted Negroes of Surinam in Guiana," published in 1796	59
Fig. 21. An old Dutch book of the period of 1770 showing the damage done by insects of the Tropics.....	62
Fig. 22. A section of right hand page of Fig. 21, with an account of sloths observed by the Author in Dutch Guiana.....	63

- Fig. 23. Adult male two-toed sloth. Observe equal length of limbs, more projecting muzzle and less developed tail..... 64

DEVELOPMENT OF SOLDIER TERMITES

Figures 24 to 32 inclusive

- Plate A. Map; British Guiana Tropical Research Station of the New York Zoological Society..... 70
- Fig. 24. Small pigmented, work-like form of *Nasutitermes* (*Constrictotermes*) *cavifrons* (Holmgren) which later changes into a soldier..... 76
- Fig. 25. Mature, pigmented soldier of *Nasutitermes* (*Constrictotermes*) *cavifrons* (Holmgren)..... 77
- Fig. 26. Nasuate soldier nymph emerging from a pigmented, work-like skin 78
- Fig. 27. a. Side view of the head of a small pigmented worker-like form; b. molting, individual showing the nose starting to push out through the split Y-suture; c. nasuate soldier nymph after change from small, pigmented work-like form; d. mature, pigmented soldier..... 78
- Fig. 28. a. Mandibles of a small, pigmented, worker-like form; b. mandibles of a mature, pigmented soldier..... 79
- Fig. 29. a. Maxilla of a small, pigmented, worker-like form; b. maxilla of a mature, pigmented soldier..... 80
- Fig. 30. a. Labium of a small, pigmented, worker-like form; b. Labium of a mature, pigmented soldier..... 81
- Fig. 31. a. Longitudinal section through the head of a small, pigmented worker-like form; b. Longitudinal section through the head of a soldier nymph..... 82
- Fig. 32. a. Cross-section through the head of a small, pigmented, worker-like form in the region of the frontal gland; b. cross-section through the head of a recently emerged soldier nymph in the region of the frontal gland; c. cross-section through the head of a mature pigmented soldier in the region of the frontal gland..... 83

A NEW POLYCHAETOUS ANNELID

Figure 33

- Fig. 33. *Namonereis kartaboensis* Treadwell, sp. nov. A. anterior end of body x 10; B. fifteenth parapodium x 35; C. ventral type of seta x 250..... 102

A RIVER DOLPHIN FROM KARTABO

Figures 34 to 45 inclusive

- Fig. 34. Sketch map showing the range of activity of *Sotalia guianensis* at Kartabo, Bartica District, British Guiana... 106

	PAGE
Fig. 35. a, b, <i>Sotalia guianensis</i> Van Beneden.....	108
Fig. 36. a, b, <i>Sotalia guianensis</i> Van Beneden.....	109
Fig. 37. a, <i>Sotalia guianensis</i> Van Beneden. Outline sketch made from field notes. b, <i>Sotalia guianensis</i> Van Beneden; portion of the vertebra showing union of first and second cervicals	111
Fig. 38. a, b, c, d, e, f, <i>Sotalia guianensis</i> after Van Beneden and Gervais, "Osteographie des Cetaces, vivants et fossils"	112
Fig. 39. a, b, <i>Sotalia guianensis</i> Van Beneden; a, upper figure sternum; b, teeth.....	116
Fig. 40. <i>Sotalia guianensis</i> Van Beneden; the rostrum is long, narrow and compressed.....	117
Fig. 41. <i>Sotalia guianensis</i> Van Beneden; the pterygoids are separate and divergent posteriorly.....	119
Fig. 42. a, b, <i>Sotalia guianensis</i> Van Beneden; a, upper jaw; b, lower jaw is high behind and curved.....	119
Fig. 43. <i>Sotalia guianensis</i> Van Beneden; the humerus is shorter than forearm and radius is broad.....	120
Fig. 44. a, b, <i>Sotalia guianensis</i> Van Beneden; a, tympanid bones; b, the scapula showing the coracoid and acromion.....	121
Fig. 45. a, b, c, d, e, f, <i>Sotalia guianensis</i> Van Beneden; a, axis vertebra; b, c, d, e, vertebra showing varying character of lateral foramina; f, vertebra with no indication of lateral foramina	124

THE REDUVIIDAE OF KARTABO

Figures 46-47

Fig. 46. a, b, <i>Vescia adamanta</i> ; c, <i>Acanthiscium superbus</i> ; d, <i>Gnathobleda maculosa</i> ; e, <i>Pnirontis demerarae</i> ; f, <i>Repipta affinis</i> ; g, <i>Ghilianella brevicornis</i> , apex of abdomen of male; h, <i>Ghilianella andersoni</i> , apex of abdomen of male; i, <i>Spiniger mustelinus</i> female.....	138
Fig. 47. a, <i>Zelus pallidinervus</i> ; b, <i>Zelus kartabensis</i> ; c, <i>Zelus araneiformis</i> ; d, <i>Zelus formosus</i> ; e, <i>Zelus rufigeniculatus</i> ; f, <i>Debilis fraudulenta</i>	148
